

I Feel Sick

Written By: Amanda Langan, M.A., CCC-SLP

Sometimes my body doesn't feel so good.

It may hurt, feel sore, achy,
or upset.

I can tell my parents or
teachers that I do not feel good,
and they will help me!

They will ask me what hurts,
and I can tell or show them
where it doesn't feel good.

They may take my temperature,
but it won't hurt!

I may need to go to the doctor
to get medicine to make my
body better.

I may need to stay home to
let my body rest.

My teachers and friends will
miss me, and I will miss my
teachers and friends!

But I will see my teachers and
friends when I am better!
